Hi, my name is Owen and I am a Front End Developer and WordPress Web Developer from Lagos, Nigeria with over 3 years of experience designing, building and customizing websites, specifically in Front End Development. How can I help? I have a passion for building responsive, engaging sites that focus on user experience, content and design. You need a site that converts? SEO driven? Responsive and user friendly? An experienced developer who would take your project and treat it with utmost priority? Again, while there may be a lot who can provide these services, I seek to provide them with a comprehensive, pre-determined strategy to assure your return on investment. Why hire me? I am a certified Web Developer and I take on projects that I know are well within my line of expertise. I have strong knowledge of the languages needed and required to design and build responsive sites, e.g HTML, CSS, JavaScript, React, JQuery, PHP. So what are we waiting for? Let's get started! Also, do not hesitate to reach out with any questions you have. I look forward to working with you
